

STANDARD OPERATING PROCEDURE

Primary Target Metrics (KPIs): Time-to-Productivity (TTP) ≤ 28 Days | IT Provisioning SLA Compliance ≥ 98% | Day-1 Readiness: 100% | 30-Day Engagement Score ≥ 85/100

1. Executive Summary & Purpose

This Standard Operating Procedure (SOP) formalizes and standardizes the end-to-end employee onboarding operational workflow across global corporate operations. By orchestrating handoffs between HR Operations, Information Technology (IT), Facilities, and Department Hiring Managers, this protocol eliminates operational friction, enforces strict Service Level Agreements (SLAs), and accelerates new-hire productivity.

2. Operational RASCI Governance Matrix

Process Phase	HR Ops	IT Dept	Facilities	Hiring Mgr	New Hire	SLA Window
Offer Sign & Master Record Sync	Accountable	Informed	Informed	Consulted	Informed	T-14 Days
IT Access Ticket & SSO Setup	Informed	Accountable	Informed	Consulted	-	T-10 Days
Hardware Provisioning & Shipping	Informed	Accountable	Support	Informed	Informed	T-5 Days
Workspace Staging (In-Office)	Informed	Support	Accountable	Informed	-	T-3 Days
Day-1 Systems Activation & Orientation	Accountable	Support	Informed	Responsible	Informed	Day 1 (09:00 AM)
30-60-90 Day Goal Blueprint Creation	Informed	-	-	Accountable	Responsible	Day 5
Milestone Review Check-ins	Consulted	-	-	Accountable	Responsible	Days 30, 60, 90

3. Detailed Operational Workflow Protocol

3.1 Phase 1: Pre-Boarding Execution (T-14 to T-1 Days)

- T-14 Days:** Upon digital offer execution in the ATS (Workday/Greenhouse), HR Ops validates profile data and writes the candidate record to the Central Control Tower. This automatically dispatches an API webhook hook to IT Service Management.
- T-10 Days:** IT Infrastructure assigns security role definitions, provisions Single Sign-On (SSO) credentials, and assigns application license tiers based on role profile matrices.
- T-5 Days:** IT configures physical hardware (laptop, security key, peripheral kit). Hardware is packaged and shipped via trackable courier to remote hires or staged in-office.
- T-3 Days:** HR Ops sends the "Day-1 Gateway Packet" to the candidate's personal email, containing itinerary details, MFA setup instructions, and Day-1 agenda.

3.2 Phase 2: Activation & Integration (Day 1 to Week 1)

- **Day 1 (09:00 - 11:30 AM):** Executive Orientation & HR Compliance. Right-to-work verification, benefits overview, and corporate security policy sign-off.
- **Day 1 (11:30 AM - 12:30 PM):** System Setup Validation. IT Helpdesk conducts a 30-minute verification session to validate logins, MFA configuration, and VPN access.
- **Day 1 (13:30 - 17:00 PM):** Departmental Onboarding. Hiring Manager introduces team, assigns Buddy, and reviews immediate role scope.
- **Day 2–5:** Role-specific system training; Manager co-creates 30-60-90 day performance goals.

3.3 Phase 3: Milestone Progression (Days 30, 60, 90)

- **Day 30 Review:** Manager and New Hire complete 30-Day Check-in in HR Portal focusing on tool adoption and cultural integration.
- **Day 60 Review:** Evaluation of early work deliverables and autonomous task execution.
- **Day 90 Review:** Graduation review. Transition from onboarding to standard annual performance management framework.

4. Escalation & Exception Protocols

If hardware shipping tracking indicates non-delivery by T-2 Days, IT Helpdesk auto-escalates to Tier 2 Support to dispatch a backup unit via Priority Overnight Express. Day-1 login failures require IT resolution within 30 minutes per SLA agreement.
